I'm a student majoring in Information Systems at NIIT I-TECH School of Information Technology, with a focus on back-end web development. I have experience building applications using PHP (Laravel) and working with both MySQL and PostgreSQL databases.

As part of a campus service project, I developed a profile website and an online registration system for a boarding school using Laravel and MySQL, which included data management features and an online registration form. Although I don't have formal work experience yet, I actively work on personal projects and continuously improve my technical skills through self-learning. I enjoy solving technical challenges and am highly motivated to keep growing in the field of web development.

EDUCATION

Sekolah Tinggi Teknologi Informasi NIIT – **XXX, Indonesia** **Sep/2021-Aug/2025**

Bachelor's Degree in Information System, 3.74/4.00 (135/144 credits taken)

- Completed a **final thesis project** by developing a **profile website and online student admission system** for a modern Islamic boarding school using **Laravel** and **MySQL**, featuring online registration, admin dashboard, and new student data management.
- Participated in the **Bangkit Academy 2024** (Cloud Computing track), a Kampus Merdeka program by Google, GoTo, and Traveloka, with university credit conversion aligned with the academic curriculum.

WORK EXPERIENCE

Evermos X Rakamin Academy - **Virtual Internship (Project-Based)** **Feb 2025 – Mar 2025**

Backend Developer (Golang)

- Independently developed and maintained backend systems using Golang.
- Designed and implemented RESTful APIs, managed databases, and optimized system performance.
- Refactored and improved existing backend architecture.
- Strengthened understanding of backend development best practices despite the absence of direct team collaboration.

VOLUNTEER EXPERIENCE

WIR Group – **Jakarta, Indonesia** **Nov/2024**

Assistant Stage Manager

- Assisted the stage crew during the **D.Futuro Futurist Summit 2024**, supporting the setup and execution of a large-scale tech event.
- Managed stage logistics and equipment handling to ensure smooth transitions between sessions.
- Strengthened teamwork and adaptability under high-pressure event timelines.

Tech in Asia – **Jakarta, Indonesia** **Oct/2023**

Main Stage Computer Operation

- Operated technical systems and managed presentation flow on the main stage during **Tech in Asia Conference 2023**.
- Ensured accurate timing for speaker transitions and announcement displays.
- Gained valuable exposure to startup and tech industry leaders while supporting a high-profile international event.

PROJECTS

Website Profil & Online Registration **Mar/2025-Jul/2025**

PHP(Laravel) & MySQL

- Developed for an Islamic educational institution as part of a campus community service project.
- Features: institution profile page, new student registration form, and applicant data management.
- Built using Laravel with MVC architecture and backend form validation.
- Provided a simple yet efficient digital solution for online admissions.

Backend System for Signfy **Sep/2024-Dec/2024**

Node.js, Google Cloud Platform

- Led the team as **Project Manager**, overseeing task delegation, timelines, and team communication across Cloud, Mobile, and Machine Learning divisions.
- Built the backend system for **Signfy**, an AI-based sign language (SIBI) learning app.
- Handled user authentication, data storage, and API integration with the AI model.
- Containerized the app using Docker and deployed it to Google Cloud Run for scalable and managed serverless execution.

SKILLS

- **Languages:** Bahasa Indonesia (Native) | English (Limited Working Proficiency) | Arabic (Limited Working Proficiency)
- **Software & Technical Skills:**
  - **Programming:** PHP, Laravel (main language for now). Javascript, Golang.
  - **Database:** MySQL, PostgreSQL.
  - **Cloud & DevOps:** Google Cloud Platform (Cloud Run, Compute Engine, Cloud Monitoring), Docker.
  - **Tools:** Git, GitHub, Postman, Figma, VS Code, Trello, Google Workspace.
  - **Project Management:** Agile/Scrum basics, task delegation, timeline management.
- **Certifications :**
  - **BNSP – Junior Web Developer Certification** *(In Progress)*
    National Work Competency Certification (Indonesia)
    Government-recognized certification assessing core competencies in web development.
  - **TOEFL** *(Awaiting Result)*
    Standardized English proficiency test to assess reading, listening, and writing skills.
  - **Bangkit Academy 2024 – Cloud Computing Path**
    Issued by Google, GoTo, and Traveloka (Kampus Merdeka Program)
    Completed **906 hours** of intensive training covering:
  - **Backend Developer – Project-Based Internship Certificate**
    Issued by Evermos & Rakamin Academy
    Completed 1-month internship project focused on backend fundamentals, GitLab workflows, and deployment best practices.
