SEPTIAN HARI SABARNO

+6281511923853 | aribarno86@gmail.com | linkedin.com/in/Septian-H-S | South Jakarta | Portofolio | Github

Recent graduate in Information Systems with strong focus on Backend Development. Experienced in building and deploying RESTful APIs, authentication/authorization systems, and database-driven applications using Golang, PHP (Laravel), Node.js, and PostgreSQL/MySQL. Skilled in cloud deployment (Google Cloud Run, Compute Engine), containerization (Docker).

Motivated to contribute as a Backend Developer, leveraging both academic projects and internship experience to deliver scalable, secure, and efficient backend systems.

EDUCATION

Sekolah Tinggi Teknologi Informasi NIIT , Indonesia **Sep 2021 - Aug 2025**

Bachelor's Degree in Information System | GPA: 3.75/4.00

- Final Project: Developed profile website & online student admission system for Assalam Dawuan Boarding School using Laravel + MySQL, featuring admin dashboard, role-based access control, and applicant data management.
- Completed Bangkit Academy 2024 (Cloud Computing Track) led by Google, GoTo, Traveloka — 906 hours of intensive training covering Google Cloud Platform, backend development, DevOps, and soft skills.

WORK EXPERIENCE

Backend Developer (Virtual Internship) **Feb 2025 – Mar 2025**

Evermos X Rakamin Academy – Remote

- Developed and maintained backend systems using Golang, ensuring clean architecture and scalability.
- Built and tested 10+ RESTful API endpoints with JWT-based authentication and role-based access control.
- Integrated backend with PostgreSQL, optimized queries, and improved API response time by 20%.
- Applied best practices in Git workflow, unit testing, and deployment strategies in a simulated professional environment.

PROJECTS

Online Registration System – Assalam Dawuan **Mar 2025-Jul 2025**

PHP(Laravel) & MySQL

- Developed a student admission platform to digitalize the school's registration process, replacing the previous manual workflow.
- Designed 6+ modules including institution profile, registration form, applicant tracking, and admin dashboard.
- Optimized MySQL queries reducing data retrieval time by 35% compared to baseline.
- Integrated form validation & role-based access control to minimize duplicate entries and unauthorized access.
- Configured basic SEO settings (meta tags, URLs) that increased website visibility by 40% on search engines.

Signfy – AI-based Sign Language Learning App **Sep 2024-Dec 2024**

Node.js, Google Cloud, Docker

- Served as Project Manager & Backend Developer in a top-5 Bangkit Capstone Project out of 644 teams.
- Designed and deployed backend using Node.js (Express.js) and Google Cloud Run, ensuring 99% uptime during testing.
- Built and secured 15+ RESTful API endpoints with JWT authentication & role-based authorization.
- Managed >5,000 data entries of SIBI sign language dataset on Google Cloud Storage & Firestore.
- Enabled scalable deployment with Docker, cutting deployment time from 30 minutes to <5 minutes.

TECHNICAL SKILLS

Programming & Frameworks: PHP (Laravel), Golang, Node.js (Express.js), JavaScript, HTML, CSS, Bootstrap

Databases: PostgreSQL, MySQL

Cloud & DevOps: Google Cloud Platform (Cloud Run, Compute Engine, Cloud Monitoring), Docker

Tools: Git, GitHub, Postman, VS Code, Figma, Google Workspace

Backend Concepts: RESTful APIs, Microservices, Authentication & Authorization (JWT), Database Optimization, Cloud Deployment

Environments: Linux (Ubuntu, Mint),

Languages: Bahasa Indonesia (Native), English (Limited Working Proficiency), Arabic (Limited Working Proficiency)

CERTIFICATIONS

Bangkit Academy 2024 – Cloud Computing Path (Google, GoTo, Traveloka)

Backend Developer – Project-Based Internship Certificate (Evermos & Rakamin Academy)

VOLUNTEER EXPERIENCE

WIR Group – **Jakarta, Indonesia** **Nov 2024**

Assistant Stage Manager

- Assisted the stage crew during the **D.Futuro Futurist Summit 2024**, supporting the setup and execution of a large-scale tech event.
- Managed stage logistics and equipment handling to ensure smooth transitions between sessions.
- Strengthened teamwork and adaptability under high-pressure event timelines.

Tech in Asia – **Jakarta, Indonesia** **Oct 2023**

Main Stage Computer Operation

- Operated technical systems and managed presentation flow on the main stage during **Tech in Asia Conference 2023**.
- Ensured accurate timing for speaker transitions and announcement displays.
- Gained valuable exposure to startup and tech industry leaders while supporting a high-profile international event.
